

# Dekesi D-7211Z

## IP Conference Chairman Microphone

### Key Highlights

- Built-in **DSP audio processing** & acoustic echo cancellation
- Independent volume control, **5-band EQ** & auto AGC
- Web-based backend management & configuration
- **Chairman priority** — override delegate microphones instantly
- Speaker registration, permission control & speech timer
- Camera tracking integration for active speaker
- **Voting / polling** function support

The **Dekesi D-7211Z** is a professional IP conference chairman microphone featuring built-in DSP audio processing and acoustic echo cancellation. Designed for high-end meeting environments, it provides full chairman authority — including priority speaking rights and delegate microphone override — along with advanced features such as 5-band EQ, AGC, speaker registration, camera tracking, and voting functionality. Configuration and management are handled via an intuitive web-based platform.
