

Dekesi D-8008

8-Channel Audio Mixer — DSP Effects, Bluetooth & MP3 Player

Key Highlights

- **8 mono MIC inputs** — independent 48V phantom power per channel
- Each channel: **High/Mid/Low gain** + independent **Mute button**
- **99 digital DSP reverb effects** — versatile sound processing
- Outputs: **2× Stereo, 2× Line, 1× AUX, 1× Monitor**
- 7-segment stereo **level meter** for real-time output monitoring
- Integrated **MP3 player, Bluetooth & recording** function
- **High/Low EQ** adjustment for customized audio output

The **Dekesi D-8008** is an 8-channel mono microphone mixer designed for systems requiring simultaneous control of multiple audio sources. Each of the 8 MIC inputs features independent 48V phantom power, three-level gain adjustment (High/Mid/Low), and a dedicated Mute button for precise per-channel control. Multiple output options — 2× Stereo, 2× Line, 1× AUX, and 1× Monitor — provide flexible signal routing, while a 7-segment stereo level meter enables real-time monitoring. With 99 digital DSP reverb effects, a built-in MP3 player, Bluetooth connectivity, recording function, and High/Low EQ adjustment, D-8008 is a versatile multi-source mixer solution for professional audio installations.

TECHNICAL SPECIFICATIONS
