

Dekesi D-7528ZGB

Touchscreen Gooseneck Conference Microphone with Camera Tracking & Voting

Key Highlights

- **Intuitive Touch Control** — built-in touchscreen for direct on-device operation during meetings, with Chinese/English display.
- **Adjustable Display Settings** — screen brightness and volume can be adjusted directly from the touchscreen menu.
- **Customizable Wallpapers** — 3 built-in wallpaper themes, with support for changing the background image.
- **Voice Call & Wake-Up** — supports voice calling and voice activation for hands-free, convenient use.
- **Tea/Water Service Request** — attendees can send a service request directly through the microphone.
- **Camera Tracking Support** — compatible with PTZ camera systems to help follow the active speaker.
- **Voting Function** — supports on-screen voting for meetings that require live decisions.
- **Optional Modules** — attendance check-in, polling and scoring available as optional functions.

The Dekesi D-7528ZGB is a desktop gooseneck conference microphone built for professional meeting systems, combining an intuitive touchscreen interface with a full set of interactive conference controls. Beyond core speaking and chairing functions, the unit supports camera tracking for compatible PTZ camera setups and on-screen voting, making it well suited to professional conference systems that require rich interactivity. Attendees can operate the device directly through the touchscreen, place voice calls or wake the unit hands-free, and even request tea or water service without leaving their seat. Administrators can manage speaking order, control the floor, and run the overall meeting workflow, while optional modules add attendance check-in, polling and scoring. The microphone can be installed flexibly with no positional restriction, fitting a wide range of table layouts in corporate boardrooms, government offices, and conference halls.
